Email: ruknuddin.asrari@thecareerinsights.com | Year: 2026

Objective

Prepare sanity test cases for changed or updated features to verify that recent fixes or updates are working as expected.

Sanity Testing Definition

Sanity testing is focused validation performed after a specific bug fix, change, or small enhancement. It confirms the updated feature works correctly and related functionality remains stable.

Sanity Test Cases

Test ID	Feature	Scenario	Precondition	Steps	Expected Result	Status	Priority
SN-001	Updated Login Validation	Validate login still works after recent login change	Login module was updated	Test valid and invalid login	Expected behavior remains correct after change	Pass	Critical
SN-002	Password Error Message	Verify updated password validation message	Password validation changed	Submit weak/invalid password	Correct validation message appears	Pass	High
SN-003	Updated Search Filter	Validate changed search filter returns accurate results	Search filter was updated	Search valid keyword and compare displayed results	Only matching records appear	Pass	High
SN-004	Search Empty State	Verify empty/no-result search behavior	Search module was updated	Search invalid keyword	Clear no-result message is displayed	Pass	Medium
SN-005	Updated Add Form Mandatory Fields	Validate changed form required fields	Add form modified	Submit form with missing required fields	Required-field validation works	Pass	High
SN-006	Recently Fixed Save Button	Verify save button works after UI change	Save flow changed	Enter valid data and click Save	Data is saved once without duplicate submission	Pass	High
SN-007	Updated Status Dropdown	Validate status dropdown values after change	Status field updated	Open edit form and review dropdown	Correct status values are listed and selectable	Pass	Medium
SN-008	Report Count Accuracy	Verify report counts after recent reporting change	Report module updated	Compare dashboard/report counts with records	Counts match actual data	Pass	High
SN-009	Navigation After UI Update	Verify navigation links still work after UI/header change	Header/navigation changed	Click updated navigation links	All links route to correct pages	Pass	Medium

Test ID	Feature	Scenario	Precondition	Steps	Expected Result	Status	Priority
SN-010	Regression on Logout	Verify logout works after session/security change	Session handling updated	Login then logout	User is logged out and restricted pages are blocked	Pass	Critical
