

Test Summary Report

Prepared by: **Ruknuddin Asrari** | Software Quality Engineer | The Career Insights Hub LLC
Email: ruknuddin.asrari@thecareerinsights.com | Year: 2026

Objective

Summarize smoke and sanity testing activities and provide the final QA recommendation.

Testing Scope

Main application launch, homepage rendering, login/logout, navigation, search availability, create/edit/delete flows, form validation, session restriction, updated feature validation, and report/count validation.

Observations

Main application features were accessible and functional. Updated areas passed focused sanity validation. No blocker or critical defect was observed during this test cycle.

Final Recommendation

The build passed smoke and sanity testing. It is recommended to proceed with detailed functional, regression, usability, and cross-browser testing.

Execution Summary

Metric	Value
Total Smoke Test Cases	15
Smoke Passed	15
Smoke Failed	0
Total Sanity Test Cases	10
Sanity Passed	10
Sanity Failed	0
Overall Status	Passed
Build Recommendation	Accept for next testing phase
